FOLLOW US:

Founded in 1984 by entrepreneurial dairy farmers, Hilmar Cheese Company and our division Hilmar Ingredients have grown exponentially. Our original location and headquarters is now the world's largest single-site cheese and whey products manufacturing facility, and our second facility, built in 2007, is nearly equivalent in size. A third facility producing milk powders will be completed Q4 2015.

Our products – cheese, whey protein, lactose and milk powder, are used by national and international brand companies, private label and foodservice in more than 50 countries.

At Hilmar Cheese Company we take seriously our responsibility to manage our business in a manner that balances economic, social and environmental sustainability. Recycled water accounts for more than 60% of the water used at our facilities. And at both our California and Texas facilities, we also treat our process water so it can be recycled again as clean irrigation water for local family farms.

We love what we do...we're excited about what's ahead.

PURPOSE • CULTURE • INNOVATION

YOU BELONG HERE

“ Although we've grown to become one of the world's largest producers of cheese and whey, what really sets us apart is that, in spite of our growth, we've held on to our values.

We are a people-oriented company. We're all about the people we serve and the people we hire. I think that's a big part of what makes Hilmar Cheese Company such a special place. ”

– Richard Clauss
